8. TEACHING

(a) *Areas of special interest and accomplishments*

Human Visual and Haptic Perception; Cognition; Evolutionary Psychology; Public Education About Blindness; Psychological Aspects of Advocacy; Rehabilitation; Health; Stress Management.

Teaching philosophy: It is important to provide students with current knowledge in each of the courses taught and the tools and methods to acquire that knowledge. I take into account the fact that students are busy with other courses and other activities by using my time in the classroom as effectively as possible. I teach with an understanding that the attention span of students is limited. Reinforcement of the technical material is necessary. Enthusiasm and good humor are key features to good teaching. Being knowledgeable and personable are equally important. Being clear about what and how students will be examined is also important. Teaching students to research, think and to write is certainly desirable when class size allows for that type of teaching.

9. SCHOLARLY AND PROFESSIONAL ACTIVITIES

(a) *Areas of special interest and accomplishments*

- Human visual and haptic perception; cognition;
- I have specific interests in the equivalence between vision and touch. To demonstrate that equivalence, my work has focused on the links, development and understanding of apt drawing devices and their referents, in vision and touch.
- I have applied interests in the promotion of health through the application of magnetic, far-infrared, negative ion, and nutraceutical technologies. These interests apply to 3 areas of life: performance & rejuvenation, particularly rest and relaxation; environmental, particularly air and water; and lifestyle, particularly nutrition and fitness. I'm also interested in helping people achieve balance in 5 areas of life: body, mind, family, society and finances.
- I have also worked to promote an understanding of blindness that will allow blind people to achieve their full capacity to produce and reproduce in our modern, competitive society. I have experience in guide dog training. I successfully trained 6 guide dogs; 3 for myself and 3 for other blind people. I am now training a 7th guide dog, this one, for myself. A progressive account of this training is on Facebook.

ADMINISTRATIVE EXPERIENCE AS PRESIDENT OF THE NATIONAL FEDERATION OF THE BLIND: ADVOCATES FOR EQUALITY (CANADA)

In order to improve training and opportunities for the blind of Canada, and to educate Canadians about the capacities of the blind, corporate and public fiscal support was granted, under my initiative and direction, to fund the National Federation of the Blind: Advocates for Equality and its programs.

- 1997-1998 Administered a budget of \$1,350,000
- 1996-1997 Administered a budget of \$400,000
- 1995-1996 Administered a budget of \$100,000

Part of the budgets above was spent on helping hundreds of Canadians attend conventions of the National Federation of the Blind. These conventions are designed to enhance the training, educational, employment and organizational opportunities of the blind by exposing them to the positive philosophy of blindness of the National Federation of the Blind and its application in every aspect of life. The following conventions were attended by blind Canadians through the efforts and funding of the National Federation of the Blind: Advocates for Equality (Canada):

- First annual convention of the National Federation of the Blind: Advocates for Equality (Canada), February 25-28, 1998, Vancouver, BC
- Annual convention of the National Federation of the Blind, June 29-July 5, 1997, New Orleans, LA
- Annual convention of the National Federation of the Blind, June 29-July 5, 1996, Anaheim, CA
- Annual convention of the National Federation of the Blind, July 1-7, 1995, Chicago, IL

EXTERNAL INSTRUCTIONAL EXPERIENCE

In February 2002, my wife Mary Ellen and I founded the Gabias Wellness Center, in Kelowna, BC. We host Wellness Seminars in Kelowna, at the Gabias Wellness Center. Our guest presenters have been different successful Nikken Wellness Consultants from around the world. Many are accomplished physicians or veterinarians who have contributed prodigiously to their field of medical research and clinical practice. Others come from well-respected professional backgrounds. Still others have simply taken up wellness as their new profession. All of these professionals have made a commitment to helping people learn about the prevention of illness and the management of lifestyle, while minimizing or eliminating drugs and surgery. On the past, the guest speakers were heard by teleconference telephone through a speaker phone system. Now, participants can attend the seminars through Zoom Communication where they can be seen and heard through video conferencing in their own home through their computer, tablet or smartphone.

These Seminars are well attended. Most participants come from Canada and the United States, but some have come from as far away as Australia and Saudi Arabia. Topics discussed in these Wellness Seminars relate to the importance of: proper hydration, clean water, rest and relaxation, clean air, fitness, nutrition and the importance of contact with the earth and the sun. The issue of how modern technology can enhance these basic elements of prevention is also discussed and demonstrated. Stress reduction in all of its aspects is also discussed. The Gabias Wellness Center hosted one Humans Being More Training Event in Las Vegas, NV.

The Gabias Wellness Center hosted a multi-day wellness booth at the 2020 Virtual Convention of the National Federation of the Blind. I was also presenter for the Youth Track, a panelist for the NFB Career Fair, and served on the Ambassador's committee at the 2020 Virtual Convention of the National Federation of the Blind.
